Chapter 17: Economic Problems and Challenges: Poverty and Unemployment - Section B

SECTION B

Q1. How does the World Labour Market emerge?

- Globalization: Globalization has increased the international mobility of labour.
- Migration: People move from one country to another for employment, higher education, training and better opportunities.
- Brain Drain: Skilled and educated people migrating abroad for higher income and better facilities is called brain drain.
- World Labour Market: Thus, the world becomes a single labour market, where employers can select workers from different countries.

Q2. What are the steps taken by the government to raise the standard of living of the people living below the poverty line?

- Public Distribution System: The government provides essential commodities at subsidised prices through Fair Price Shops.
- Education and Health: Steps have been taken to improve education, health services and vocational training.
- Employment: The government encourages agriculture, small and cottage industries and self-employment to increase income.
- Basic Facilities: Agricultural credit, quality seeds, fertilizers, infrastructure and welfare measures help improve living standards.

Q3. What is unemployment? Write the types of unemployment.

- Meaning: A person who is able and willing to work and is searching for work but cannot get employment is called unemployed.
- Seasonal Unemployment: Employment is available only during a particular season, while the person remains unemployed during the remaining period.
- Industrial Unemployment: Changes such as production decline, shortage of raw materials, technology changes or closure of industries may cause unemployment.
- Other Types: Indian economy also experiences disguised, structural and educated unemployment, depending on the nature of the problem.

Q4. Who are not regarded as unemployed persons?

- Willingness: A person who is not willing to work is not regarded as unemployed.
- Availability for Work: A person who is not available or does not seek employment is not counted as unemployed.
- Students: Persons studying full-time and not looking for employment are generally not regarded as unemployed.
- Voluntary Non-workers: People who choose not to work despite having an opportunity are not considered unemployed.

Q5. Explain: Relative poverty and Absolute poverty.

- Absolute Poverty: When people are unable to obtain even basic necessities of life such as food, clothing and shelter, they are considered absolutely poor.
- Basic Needs: It is related to the inability to meet the minimum standard of living.
- Relative Poverty: A person or group is relatively poor when their income and standard of living are lower than those of other groups in society.
- Difference: Absolute poverty focuses on minimum basic needs, whereas relative poverty focuses on comparison with other sections of society.
